On behalf of everyone at the Transportation Expansion (T-REX) Project, we'd like to thank you for your hard work and dedication in designing portions of the \$1.67 billion highway and light rail improvement project along the Southeast Corridor of I-25/I-225.

Never before has a multi-modal project of this scale been attempted in Colorado. Your team faced significant challenges in transforming the vision of T-REX into reality. Each challenge was met with an equal amount of determination and innovation, both of which have allowed the Project to progress at an incredibly rapid pace.

As design nears completion, we would like to take this opportunity to personally thank you for your participation on the T-REX project. Your dedication to the project has contributed to delivering a high-quality product of which we all can be proud. We also want to recognize that this effort was made at considerable personal sacrifice and we are truly appreciative of that effort.

Early on, we established a Design Team Charter that committed the entire T-REX team to work together to successfully design and construct our project by agreeing to open communication, mutual respect, trust and cooperation at all levels. The specific goals established for safety, cost, schedule, quality, constructibility and teamwork have been met by this design team. Most of all, we have thoroughly enjoyed working with you and the entire design staff in achieving the successful completion of this phase of T-REX.

Congratulations and thank you again for your hard work and significant contributions. We have been fortunate to have such qualified and talented designers collaborating on this project, and the public will be well-served by the transportation infrastructure imagined by you and the entire project design team.

Sincerely,
